## Morning Update

*(this update is expected no later than 9am every other day)*

What did I do yesterday? (DONE):

- I created invoice, list-invoice and create invoice components
- i created "create invoice" user interface
- *i added datepicker to the user interface above*

What will I do today? (TO-DO):

- *Implementation of create invoice user interface*
- *creating components for income category*
- *design of income-category*

What is getting in the way of my work? (ISSUES):

- *having intercept error while submitting invoice to backend*
-
